

when I first
arrived I felt

great small relaxed
worried nervous excited happy
glad

At first I was very excited going to a new school. Then the first day it was still exciting but so much different from primary school. It was all so different.

When I was in grade 6 my thoughts sometimes went to the thought of moving and it really worried me. But being here now makes me happy.

I felt scared and nervous. I think if I could bring something from primary school I would be more calm and comfortable. I also felt very small.

I was nervous and excited, but after about the first week I felt like I had been there forever and I am totally chilled now.

It was slightly daunting at first, but you just start thinking about how there is probably someone much more nervous than you.
